

LED ROPE LIGHT

This professional rectangle LED Rope Light is ideal where a long linear length is required – a continuous length up to 25m can be run before the power needs refreshing. Provides excellent light quality whilst reducing energy consumption. The 144 LEDs per metre, provides consistent colour wavelength, high stability and low lumen depreciation. This low voltage - 24Vdc - operates with long life LED technology.

The rope is durable (encapsulated in PVC), UV stable which makes it suitable for outdoor use (must not be submerged in water). Ideally suited for escalators, tunnel traffic control (110V), indoor swimming pools and many more applications.

Available by the 50m roll. Comes complete with 2 x 24V power cable & fixing clips.

Requires a 24Vdc transformer and colour controller for RGB.

CE certified & RoHS compliant.

ACCESSORIES

- POWER CORD & END CAP - AS-PC/EC-RO-24
- CLIPS - AS-CL-RO
- INTER-CONNECTING CABLE - AS-IC-RO
- COUPLING JOINT - AS-CJ-RO

We are also able to supply 36LED/m (3 wire) ideal for emergency exit demarkation & 108LED/m (4 wire) rope (for escalator hand rails).

CODE & COLOUR	DIMENSIONS	LED QTY PER M	VOLTAGE	POWER PER M
RO-144-24 RED	12 X 28mm	144	24Vdc	12W
RO-144-24 YELLOW	12 X 28mm	144	24Vdc	12W
